RFQ ADDENDUM #5

Request for Qualifications #KY-17-007-01

Kayenta Township Community Development Department

928.697.8451

ADDENDUM #5

NOTE: Attach to Original RFQ. However, if Proposal has already been returned, complete this amendment and return for attachment to your Proposal by 5:00 pm, September 7, 2017.

Kayenta Township

1/4 mile North of Jct. US Hwy 163 & 160

Kayenta, Arizona 86033

Attn: Heston Zonnie

SOLICITATION: Request for Qualifications # KY-17-007-01

0.67 Mile Bus Route Improvement Plans

NOTICE TO CONTRACTORS:

This Amendment forms a part of the Contract and clarifies, corrects, or modifies the original Request for Qualifications for Proposal documents prepared by the Kayenta Township.

Bid Due Date and Time: 5:00 pm, September 7, 2017 p.m. MST

Last Day for Questions: 5:00 pm, September 1, 2017 p.m. MST

Please amend and include the following information for Request for Qualifications #KY-100-1-11-5610 as follows:

- 1. Revisions to Quantity List
 - a. Base bid item 9: CMP Extensions revised to reflect total amount of new CMP needed for extensions.
- 2. Questions
 - a. On sheet PP07 showing the pedestrian crossing, can you confirm the sidewalks will be 5 feet wide and the width of the pedestrian bridge will be 3 feet?
 - i. The standard width for pedestrian bridges of this span is 6' wide.
 - ii. Contractors are encouraged to contact JBacigalupi@conteches.com to start a process for a valued engineered solution that will provide safe passage over the Q100 Water Surface Elevation. Plans provided by Arrowhead Engineering, Inc. was just a starting point.

- iii. Per Note 2, on Sheet PP07:
 - These bridge schematics are to be used by the contractor to obtain detailed engineered structural drawings complete with structural engineering stamp. The pedestrian bridge similar or equal to the kind provided by Contech will be reviewed at bidding. The plan and profile section are meant to provide bidding assistance and nothing more.
- b. On sheet PP03 & PP04, the linear feet shown on the elevation profile are different than linear feet number on the plan view. Can you confirm which one we need to use?
 - i. Only new culvert extensions will be included in the bid. Lengths shown in profile view are lengths of existing CMP. Revision made to Exhibit H: Quantity List Base Bid Item 9 to reflect total new CMP needed for extensions.
- c. On Sheet PP05, Pavement Options shown on upper left corner, what type and Manufacture of Fabric is required?
 - i. See Attached for Product Data.

RFQ #KY- KY-17-007-01

ADDENDUM NUMBER #5

ADDENDUM ISSUE DATE: September 1, 2017

Offeror certifies that Offeror has read, understands, and will fully and faithfully comply with this Request for Qualifications, its attachments and any referenced documents. Offeror also certifies that this offer was independently developed without consultation with any of the other Offerors or potential Offerors.

Arrowhead Engineering Inc. is pleased to provide the following feasibility cost estimate for the Kayenta Bus Route. The scope of work included in this estimate is for the general sitework items typically performed (grading, sewer, water, joint utilities, paving and drainage). Although we have tried to provide an accurate cost for construction, this estimate is based on several assumptions and is no way intended to represent the actual estimate characterized by the final approved design plansets. Early cost estimates usually contain a larger degree of uncertainty. A 10% contingency is added as a provision for unforeseeable elements of cost within the defined project scope. As such the user of these documents shall not hold Arrowhead Engineering Inc. liable for any errors or omissions associated with these documents.

^{*} Value Engineering Options are encouraged

GEOTEX® **601** is a polypropylene, staple fiber, needlepunched nonwoven geotextile produced by Propex, and will meet the following Minimum Average Roll Values (MARV) when tested in accordance with the methods listed below. The fibers are needled to form a stable network that retains dimensional stability relative to each other. The geotextile is resistant to ultraviolet degradation and to biological and chemical environments normally found in soils.

GEOTEX 601 conforms to the property values listed below¹. Propex performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP). This product is NTPEP approved for AASHTO standards.

NOTES:

- 1. The property values listed above are effective 04/2011 and are subject to change without notice.
- Values shown are in weaker principal direction. Minimum average roll values (MARV) are calculated as the typical minus two standard deviations.
 Statistically, it yields a 97.7% degree of confidence that any samples taken from quality assurance testing will exceed the value reported.
- 3. Maximum average roll value.
